

# SYNTHIAM

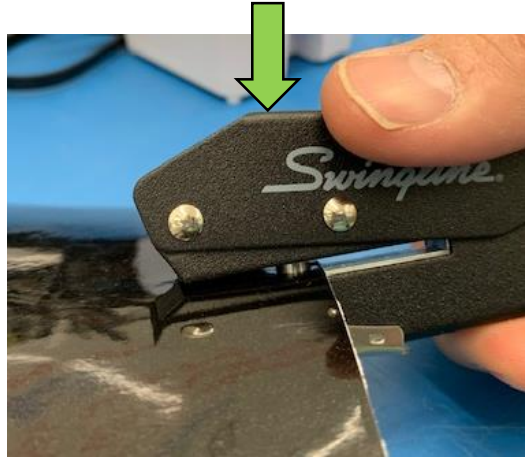

## Assembly Instructions

*Daylight Filter Rev 2*

### PARTS & TOOLS

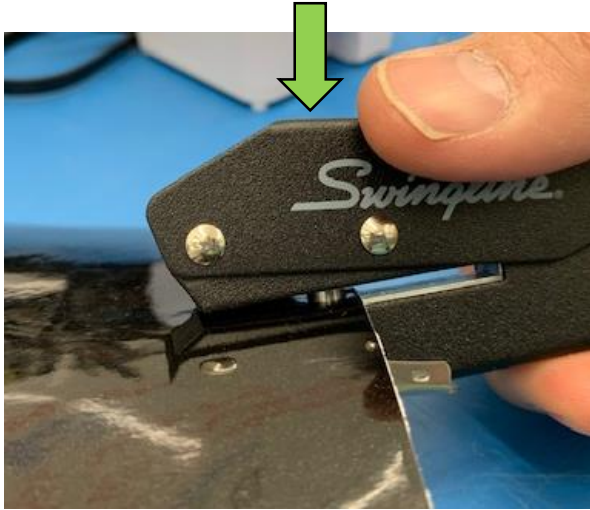

#	Qty	Name
1	1	3M 1080– G212 Black Metallic wrap film
2	2	Tweezers
3	1	Swingline single hole punch

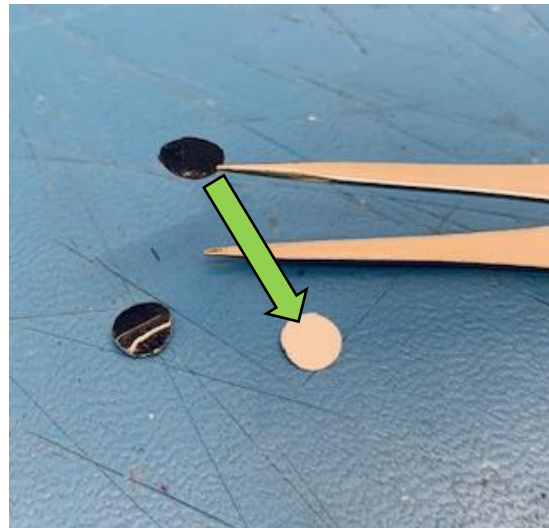

**Step 1.** Use the swingline hole punch to cut out a small circle of the film

**Step 2.** Open the metal flap at the bottom of the swingline and remove the small circle of the film

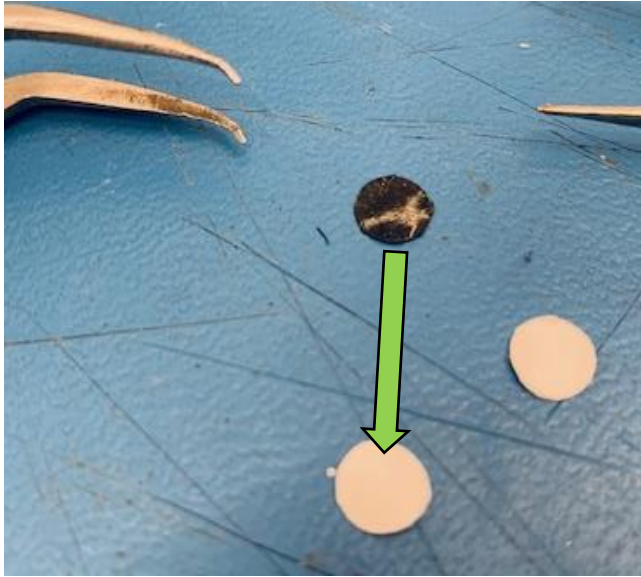

**Step 3.** Repeat Step 1 and 2 to create one more small circle of film

**Step 4.** Use tweezers to remove the paper backing from the film

**Step 5.** Use another set of tweezers to remove the paper backing from the second circle of film

**Step 6.** Place the two small circles of film precisely on top of each other with the glue sides touching

**The Daylight Filter is now Complete!**
